To Whom it may Concern:

Re: Aspenridge Construction Ltd.

I have recently had the privilege of working with Gary Ferrer of Aspenridge Construction Ltd. The project in question was modest but complex, involving replacement of an existing exterior walkway and deck in an existing strata building that was occupied throughout construction.

I found Gary's company's work to be of excellent quality. He is knowledgeable about building envelope matters and did an excellent job of integrating the remediated areas with the existing construction. The work was largely executed during the worst of the 2006-07 winter storms, and his temporary measures resulted in minimum disruption and inconvenience for residents.

At the recent completion of the project, I only identified two minor deficiencies during my final review, and Gary has been quick to deal with them.

In summary, I believe Gary's company represents little risk to a warranty provider. In addition to his and his crews' excellent building envelope knowledge, he operates in a professional manner that emphasizes good communication with professionals and owners alike. I hope to work with Gary on future projects.

Yours truly,
Morrison Hershfield Limited
